To whom it may concern,

Please do not remove the trees in uptown Whittier along Greenleaf from Hadley to Wardman. There is no telling the impact it could have and since there is no extensive research to support this type of uprooting, it seems unnecessary and undeniably costly. It doesn't make sense to uproot these trees and cause so much construction when it could be avoided and money could be saved. Having these large trees definitely adds to the beauty and nostalgia of uptown. So Again, we ask that you all please rethink removing these, it would be a huge loss and disappointment for Uptown Whittier locals and frequent visitors alike. Please Save the trees!

Thank you & regards,
Monica Marquez
