To my representative members who council the city I reside in,

I ask that we keep the trees of Uptown Whittier intact and to not cut them down. I'm not sure why there would be any incentive to do so.

I've heard that the trees are not native to the area, and yet neither are the trees that you plan to replace them with.

I have also heard that there is an aesthetic desire to change the type of tree there is. Uptown Whittier is so beautiful, I love inviting friends and family to hang out in the area. They look around and say how beautiful the community is, and the trees contribute immensely to its comfortably.

Not only do the current trees look beautiful, but they provide shading and are good for the Earth!

I'm just saying- Dr. Suess and the Lorax would be very disappointed in you if you proceeded to cut down the trees.

I'm asking that you at least listen to me- an actual living 23 year old resident of the city.

Thanks I hope you read and consider my email.
