Dear Whittier city council,

I am begging you please do not remove the beautiful history ficcus trees from uptown Greenleaf street. I have been a resident of Whittier my whole life and every time I bring friends from other parts of the US or even parts of La like Manhattan Beach they comment on how incredible the trees are, the amazing shade they provide. These trees are what make that street so special. They have been here and grown and are part of the city. It would be a crime to take them out. They bring character, shade and joy to our beautiful city. We must find another solution. Re planting new trees is NOT it! It would take away the soul of the city and that street. Please I am begging you to not remove the trees. I am honestly emotional just thinking about it and believe it would be a huge mistake. Thank you for your consideration.
